SDE Resource at CSS

This paper will document how to access data from the *CSS SDE resource*. The service provides an extensive catalogue of vector datasets.

Start in ArcGIS Explorer under the ADD CONTENT control. Select **Geodatabase Data**.

If you already are connected to a service it will be listed in the **Select a Geodatabase** window. If you are not already connected click on the **Specify a different geodatabase** link (see arrow in image below).

Fill in the form as follows:

The 'Add Geodatabase' dialog box is shown with the following fields and options:

- Geodatabase type:** ArcSDE Geodatabase (selected from a dropdown menu)
- Server:** 10.90.95.207
- Service:** 5152
- Database:** mcgisde
- Account:**
 - ☐ Operating system authentication
 - ☒ Database authentication
 - User name:** SDE_Guest
 - Password:** SDEGuest@CSS (masked with dots)
 - ☒ Save user name and password
- Transactional version:** sde.DEFAULT (with a 'Change...' button)

At the bottom are 'Back', 'Next', and 'Cancel' buttons.

Make your choice from the resulting list:

The 'Add Geodatabase' dialog box is shown with the 'Choose a dataset' section. The list of datasets includes:

- MCGISDE.MCGISDEOWNER.ADM_PY_UFS_FIREINDEXCELLS
- MCGISDE.MCGISDEOWNER.CEN_CEN_BLOCKGROUPS
